

CAREER OBJECTIVE

Driven Computer Science student passionate about transforming ideas into intelligent, real-world solutions using AI/ML, Generative AI, RAG, and full-stack development. Through internships, hackathons, and hands-on projects, I have developed practical experience in building AI-powered applications.

WORK EXPERIENCE

AI For Sustainability Intership • Internship
1M1B (One Million For One Billion), Virtual

Jul 2026 - Sep 2026

Worked on AI for sustainability use cases, exploring RAG, agentic AI, and LLM-based solutions to address real-world sustainability challenges and improve data-driven decision-making.

EDUCATION

B.Tech, Computer Science & Engineering
Svyasa Demmed To Be University

2024 - 2028

Senior Secondary (XII), Karnataka State Board
Science

2024

KLE Society's School, Bangalore

Percentage: 89.00%

Secondary (X), CBSE
The San Global School

2022

Percentage: 86.40%

TRAININGS / CERTIFICATIONS

Career Essentials In Generative AI By Microsoft And LinkedIn
Jul 2026
Linkedin, Virtual

AI Agents Contest
Jun 2026 - Jul 2026
Microsoft, Virtual

Ai Esstenials
May 2026 - Jun 2026
Google, Virtual

Cisco Certified Network Associate - Networking
Feb 2026 - Present
Cisco networking academy, Virtual

Deloitte Australia - Data Analytics Job Simulation
Feb 2026 - Present
Forage, Virtual

Introduction To Programming Using Python
Feb 2026 - Present
Hackerrank, Virtual

Introduction To Data Science
Feb 2026 - Present
Cisco networking academy, Virtual

Data Science For Business
Jan 2026 - Present
L&T Edutech, Bengaluru

PORTFOLIO

[Portfolio link ↗](#)

PROJECTS

PostflowAI

Jun 2026 - Sep 2026

Built an AI-powered content workflow platform that helps users generate, refine, and manage social media content using LLM-based automation and intelligent workflows.

FACT-CHECK AI ↗

Feb 2026 - May 2026

Built an AI-powered Fact & Claim Verification system using Gemini, RAG, ChromaDB, and FastAPI to verify claims, retrieve supporting evidence, and generate confidence-based results with citations.

Elder-Tech ↗

Jul 2025 - Aug 2025

Developed an elder-friendly technology assistance platform to help senior citizens understand smartphones, digital payments, and video calling.

SKILLS

- | | | |
|-----------------------|--|---------------------------|
| • Algorithms | • Web development | • Python |
| • C# | • Java | • Critical thinking |
| • Leadership | • Problem Solving | • Artificial intelligence |
| • Machine Learning | • HTML | • React |
| • Prompt Engineering | • Software Development Life Cycle (SDLC) | • Agile Methodology |
| • Generative AI Tools | • Frontend development | • JavaScript |
| • HTML 5 | • APIs | |

ADDITIONAL DETAILS

- 3rd Position GeeksforGeeks Hackathon, 03/2026
- I have been awared as a outstanding student in our university on engineers day. For my overall achivements in the academic 2026 year.

AI - Tutor ↗

Apr 2026 - May 2026

It is an AI model created for the students four their academics purpose in which they can study in their own space. The model is trained using ML algorithms

AI Powered Power BI ↗

Feb 2026 - Mar 2026

Developed an interactive business intelligence dashboard using Microsoft Power BI to visualize, analyze, and monitor data insights in real time.
